## PPAF INSIDER

March 1, 2017

**[DONATE!](#)**

### **January-February Updates and March Events:**

*From the Executive Director:*

*The year has gotten off to a fast start, with PPAF and our colleagues working together to improve life in Haiti and to collaborate on issues that are important for health, economic well-being, women & girls, and the environment.*

*Please view the four-minute video we have just produced on this work.*

*<https://youtu.be/2086vf9nuMg>*

*We have expanded to work not only with ethanol cookstoves (and ethanol production), but also biodigesters for biogas cooking, and solar ovens. In various homes, businesses and communities it makes sense to cook with a combination of these. PPAF provides technical advice and skills and acts as a champion for clean cooking. Read about our work below!*

*Also read about Upcoming Events, including a PPAF Seminar in New York on March 15th.*

*David Stillman, PhD  
Executive Director*

### **PPAF and KDCK January Travel to Haiti**

*A trip to Haiti in January saw PPAF Senior Fellow Tom Setchel working with KDCK Chair Rose Bazile to meet with communities and collaborating organizations, to demonstrate new cooking options and to install two biodigesters in Cotes de Fer, Rose's hometown.*

*They also visited an orphanage and a women's training institute to assess needs and opportunities. They visited an elementary school to review the current status of a large biodigester Tom had previously helped to install and to demonstrate additional options.*

*Rose introduced Tom to her network of friends and colleagues and organized several demonstrations of cooking solutions.*

*Tom visited the owner of a distillery PPAF worked with previously and saw the improvements made. He learned the company can now provide sufficient ethanol fuel to start commercial relations with the stove manufacturer that co-designed and tested our locally-made ethanol stove Recho EcoVit.*
